A Message from the State Board of Education and the State Superintendent of Public Instruction

The arts are a dynamic presence in our daily lives, enabling us to express our creativity while challenging our intellect. Through the arts, children have a unique means of expression that captures their passions and emotions and allows them to explore ideas, subject matter, and culture in delightfully different ways. Achievement in the arts cultivates essential skills, such as problem solving, creative thinking, effective planning, time management, teamwork, effective communication, and an understanding of technology.

The visual and performing arts standards presented here are comprehensive and provide important guidance for schools to prepare curricula for students in prekindergarten through grade twelve. For the four disciplines of dance, music, theatre, and visual arts—each with its own body of knowledge and skills—the standards are organized into five

strands that are woven throughout all artistic experiences. The standards incorporate both traditional means of artistic expression and newer media, such as cinematography, video, and computer-generated art.

Educators are encouraged to take the standards and design curricular and instructional strategies that address the needs of their students, teachers, and families. Local educational agencies will want to consider ways to include standards-based visual and performing arts instruction both in regular arts instruction and into other subject areas for interdisciplinary instruction.

The visual and performing arts standards reflect our belief that all children should have access to challenging curriculum content, exhibit a high level of performance proficiency, and be prepared for the world of tomorrow.

Introduction

Dance, music, theatre, and the visual arts have endured in all cultures throughout the ages as a universal basic language. The arts convey knowledge and meaning not learned through the study of other subjects. Study in and through the arts employs a form of thinking and a way of knowing based on human judgment, invention, and imagination. Arts education offers students the opportunity to envision, set goals, determine a method to reach a goal and try it out, identify alternatives, evaluate, revise, solve problems, imagine, work collaboratively, and apply self-discipline. As they study and create in the arts, students use the potential of the human mind to its full and unique capacity. The visual and performing arts are a vital part of a well-rounded educational program for all students.

The *Visual and Performing Arts Content Standards for California Public Schools, Prekindergarten Through Grade Twelve*, represents a strong consensus on the skills, knowledge, and abilities in dance, music, theatre, and the visual arts that all students should be able to master at specific grade levels, prekindergarten through grade twelve, in California public schools.

The standards were built on the components of arts education contained in the *Visual and Performing Arts Framework for California*

Public Schools, Kindergarten Through Grade Twelve, which was adopted by the State Board of Education in 1996. The strands and standards in this publication describe the content that students need to master by the end of each grade level (prekindergarten through grade eight) or cluster of grades (grades nine through twelve at the proficient and advanced levels).

These standards were developed in response to Senate Bill 1390 (Murray), signed by Governor Gray Davis in September 2000. That bill calls for the adoption of visual and performing arts content standards by the California State Board of Education and states that instruction in the visual and performing arts should be made available to all students. However, as with standards in other curriculum areas, the bill does not require schools to follow the content standards. Nothing in the bill mandates an assessment of pupils in the visual or performing arts. As stated in the bill, “The content standards are intended to provide a framework for programs that a school may offer in the instruction of visual or performing arts.”

Format of the Arts Content Standards

For each arts discipline the content standards are grouped under five visual and

performing arts strands: artistic perception; creative expression; historical and cultural context; aesthetic valuing; and connections, relations, and applications. At each grade level, prekindergarten through grade eight, content standards are specified for each strand. For students in grades nine through twelve, the proficient level of achievement can be attained at the end of one year of high school study within an arts discipline after the student has attained the level of achievement required of all students in grade eight. Many students also elect to take additional arts courses at the advanced level. That level can be attained at the end of a second year of high school study within an arts discipline after the proficient level of achievement has been attained.

These standards are written to apply to all students and at each grade level build on the knowledge and skills the student has gained in the earlier grades. When reading the standards at a particular grade level, one must know the standards for all previous grade levels to understand how expectations are based on prior learning.

An examination of the standards for any of the art forms at a given grade level will reveal overlaps and points of connection across the strands because the strands and the standards are intrinsically interrelated. For example, when working with a partner or small group in creating a dance sequence, the student is applying his or her skills and perceptions (Strand 1), is demonstrating proficiency in creative expression (Strand 2), and is reflecting on knowledge of the work of other dancers (Strand 3). In the same task the student is also participating in the critique process as he or she evaluates the dance sequence (Strand 4), is demonstrating skills in working with others, and is perhaps incorporating themes from other disciplines

and reflecting on what a choreographer must know and be able to do (Strand 5).

This publication is organized according to the four arts disciplines: dance, music, theatre, and the visual arts. A glossary of key terms is provided at the end of the standards for each of the arts.

Guiding Principles of the Arts Content Standards

Essential guiding principles for arts education programs are contained in the *Visual and Performing Arts Framework for California Public Schools, Kindergarten Through Grade Twelve*, and are reflected throughout these content standards. First, the arts are core subjects, each containing a distinct body of knowledge and skills. Academic rigor is a basic characteristic of a comprehensive education in the arts, including the following:

- Learning through active practice, rehearsal, and creation or performance of works in the arts
- Reading about the arts and artists
- Researching, writing, and communicating about the arts
- Reflecting on the arts in thoughtful essay or journal writing on one's observations, feelings, and ideas about the arts
- Participating in arts criticism on the basis of observation, knowledge, and criteria

Another important goal of the standards is to help students make connections between concepts in all of the arts and across subject areas. The fifth strand in these standards requires the student to connect and apply what is learned in the arts to other art forms and subject areas and to careers.

The arts standards respect the multiplicity of cultures represented in California schools. They allow students to experience the arts

from the perspectives of American culture and worldwide ethnic, racial, religious, and cultural groups.

Throughout the standards technology is recognized as an essential tool that enhances learning and expression in all the arts disciplines and provides for expanded forms of expression in digital and electronic media. New technologies for the arts, arts-related computer applications, and emerging arts-related careers are especially vital in California, where the demand for individuals with artistic skills and career orientations has been steadily growing in the vast arts and entertainment industry.

Delivery of a Standards-Based Arts Education Program

The standards identify what all students in California public schools should know and be able to do at each grade level. Nevertheless, local flexibility is maintained with these standards. Topics may be introduced and taught at one or two grade levels before mastery is expected. Decisions about how best to teach the standards are left to teachers and to school district staff. Although the standards do not specify how the curriculum should be delivered, they do inspire the use of a variety of teaching strategies, both teacher-directed and student-centered. Various grouping strategies (individuals, pairs, small groups,

and large groups) provide opportunities for all students to succeed. All students should participate in dance, music, theatre, and the visual arts as performers and creators.

A comprehensive arts education program is composed of three modes of instruction:

1. Subject-centered arts instruction in dance, music, theatre, and the visual arts
2. Instruction connecting the arts disciplines
3. Instruction connecting the arts and other core subjects

Subject-centered arts instruction focuses on developing foundation skills in each arts discipline. Instruction connecting the arts disciplines does so in a well-planned, meaningful, focused way. Knowledge of two or more arts disciplines and skill in performing and creating in those disciplines are mutually reinforcing and demonstrate the underlying unity of the arts. Instruction connecting the arts with other core subjects does so in substantive ways that strengthen the instructional goals for those subjects.

A thoughtful curriculum design provides students with alternative ways to perceive and experience the world. A standards-based arts education program provides a way by which all students can work at a personalized pace, develop self-expression and self-confidence, and experience a sense of accomplishment.
